

What To Expect When You Visit Our Office

First and foremost the health and safety of our patients and staff is our first priority.

With that, comes some new changes and guidelines we ask you to please follow:

Everyone over the age of 2 entering the office must wear a mask.

We are screening each patient and staff with a temperature check and a screening questionnaire.

We have a hand sanitizing station at the entrance.

We are sanitizing touched surfaces, eye glasses and equipment in between each patient.

We are limited the number of people allowed in the office at one time so we can maintain social distancing.

Please only bring friends and family into the office with you that are absolutely necessary. Please do not bring children into the office unless they are in for eye care.

Thank you for your patience with our new protocols. Our staff will continue to go above and beyond so that each one of our patients feels comfortable during their appointment.

Sincerely,

East Fishkill Eye Care
